

TheMonthlyMinute

Winter 2023: DECEMBER

Welcome to winter. The hushed, white landscape evokes a sense of stillness and peace. The snow-covered landscapes and frozen lakes create a serene atmosphere.

It's a time when nature seems to retreat into quiet contemplation. The beauty of this silence lies in the fact that it allows us to appreciate the subtle sounds that are often drowned out by the noise of everyday life. The crunch of snow underfoot, the crackling of a fire, or the rustling of leaves in the wind are all sounds that can be appreciated in the silence of winter..
